Digitalizacija visokog obrazovanja – neiskorišteni potencijal?

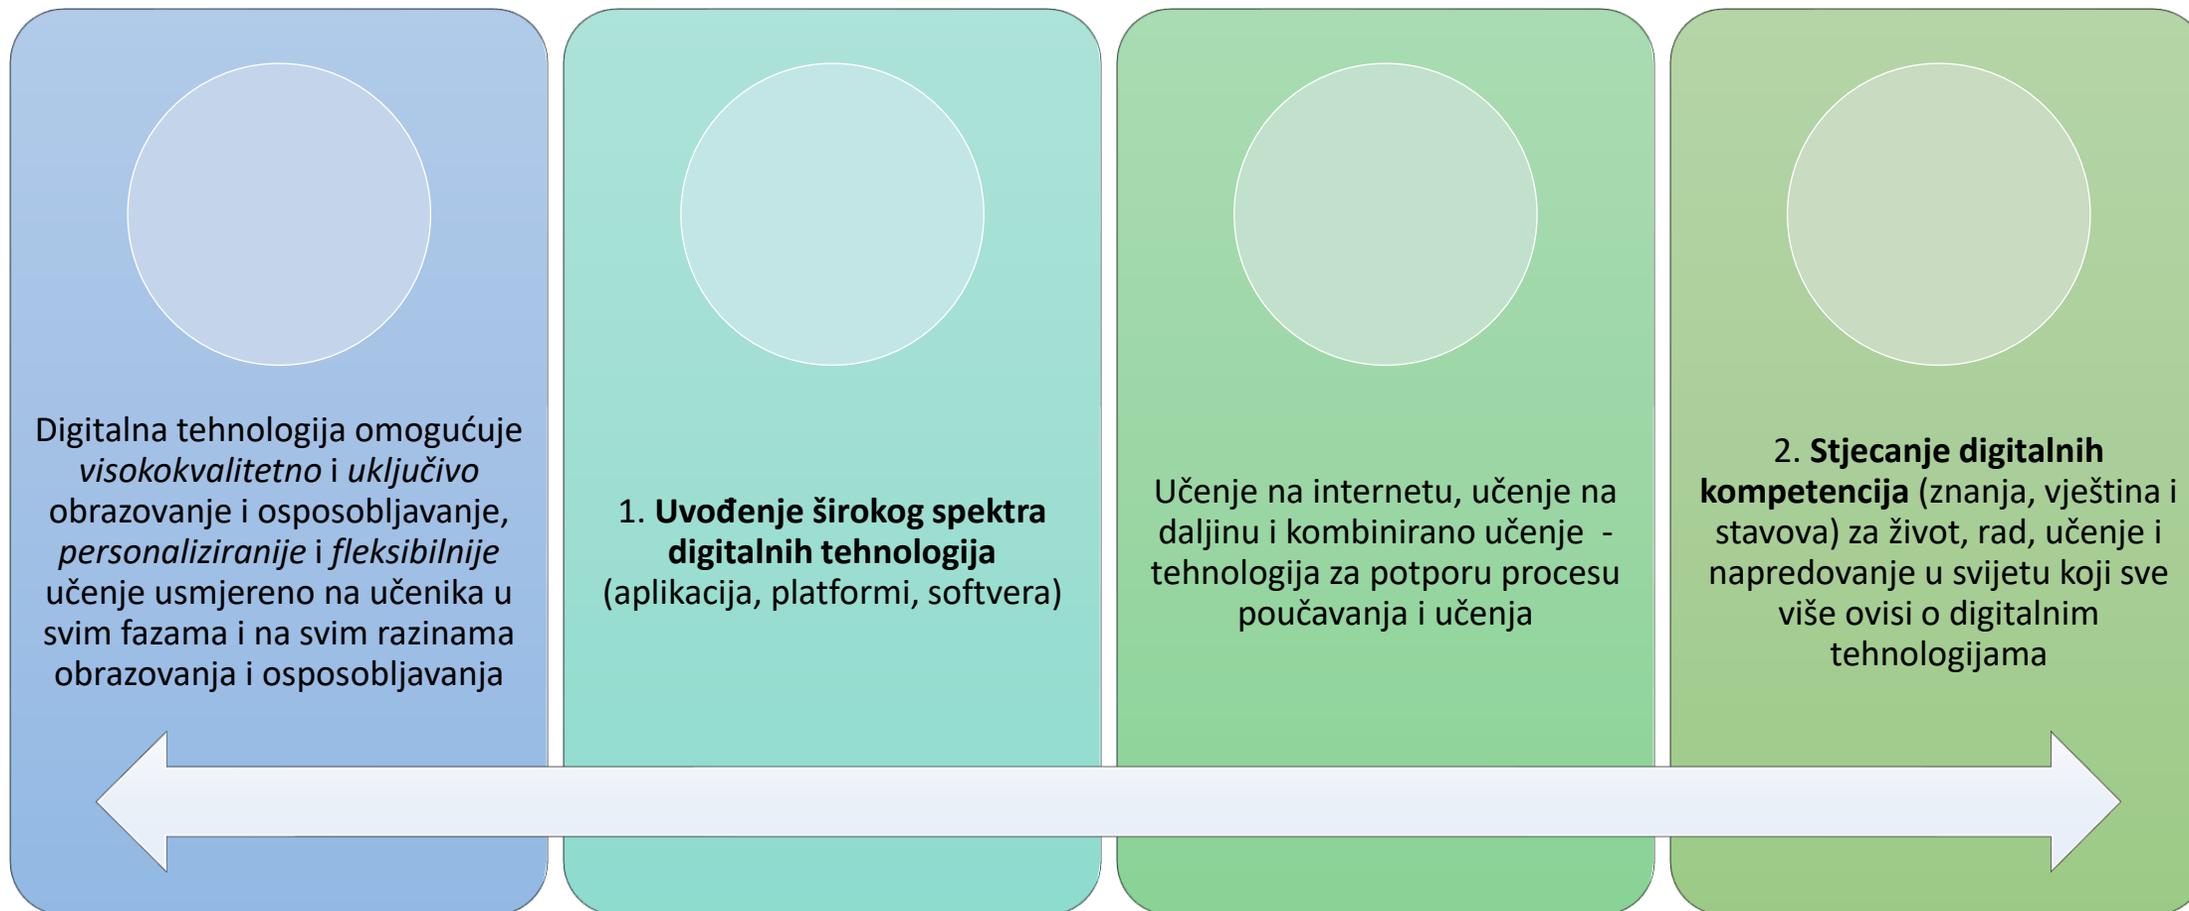

Izv. prof. dr. sc. Paula Poretti

Pravni fakultet Osijek
DiGinLaw, 8. ožujka 2023., Osijek

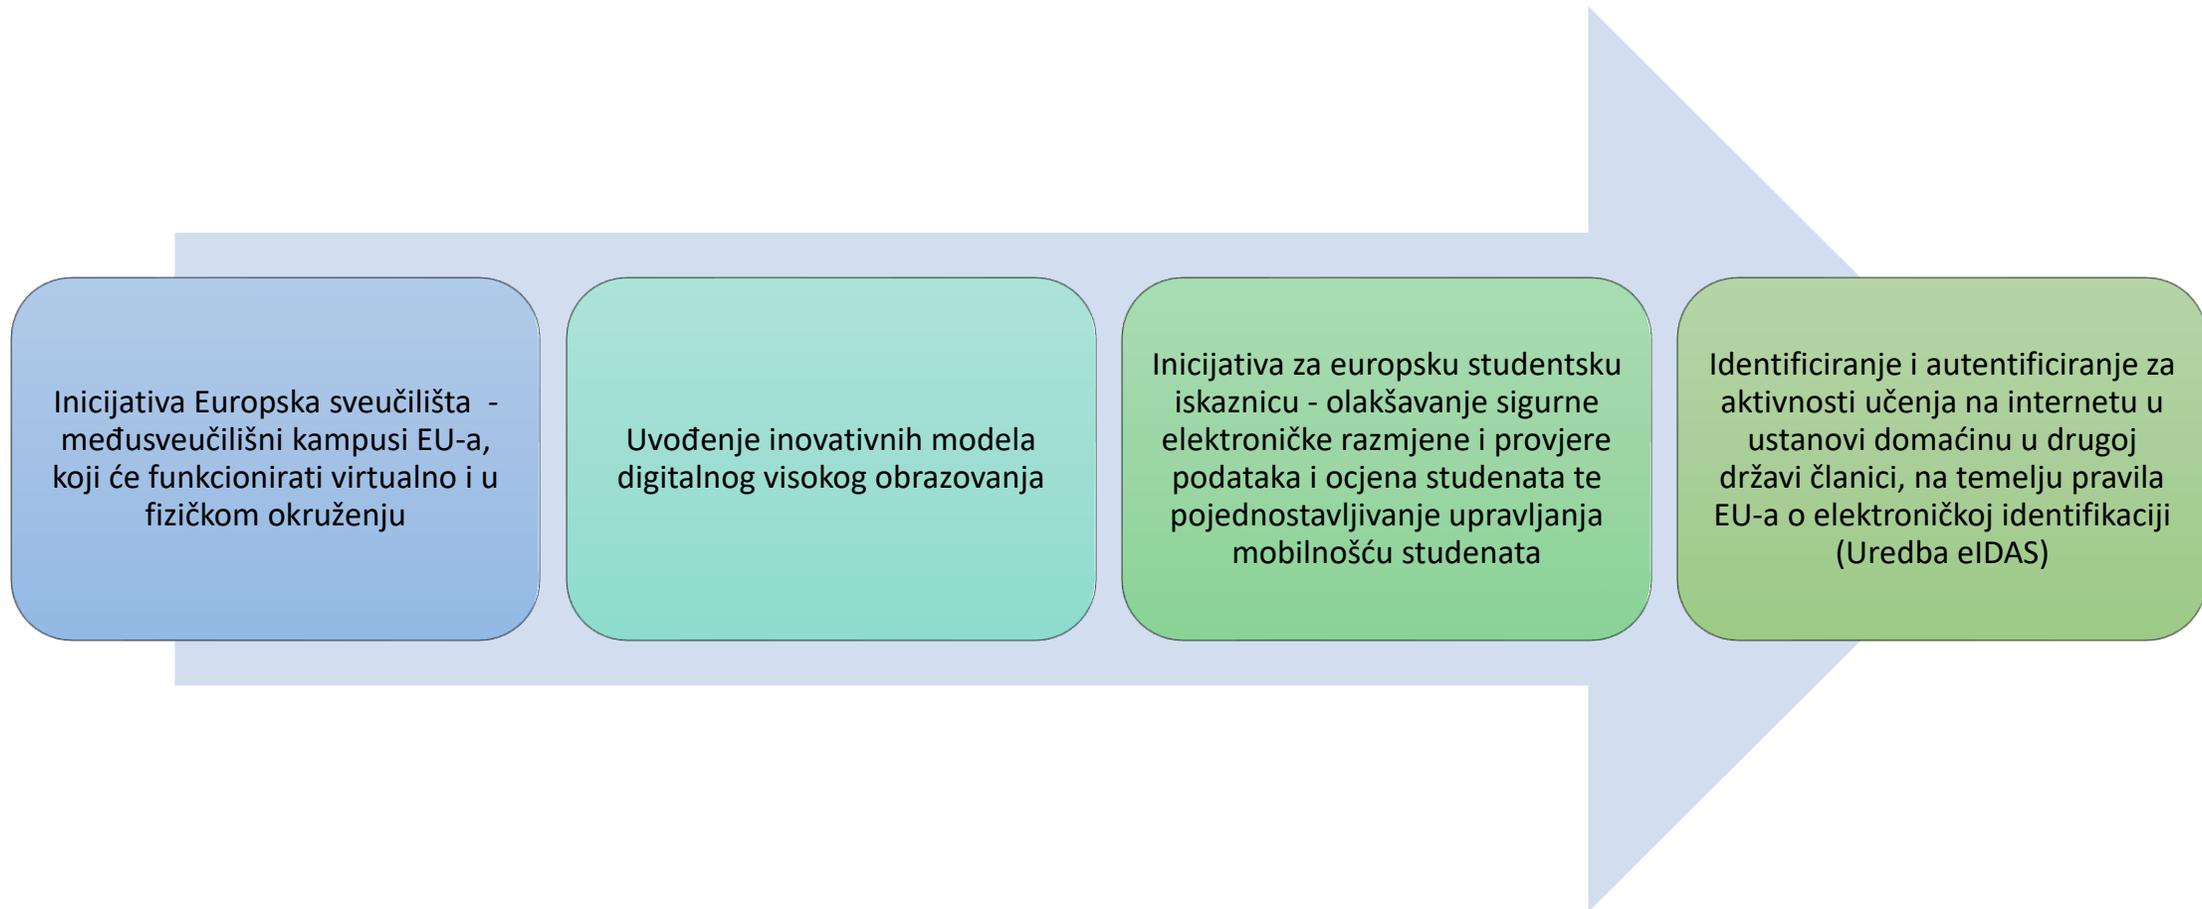

Strateški ciljevi digitalnog obrazovanja u EU i RH

Akcijni plan za digitalno obrazovanje za razdoblje 2021.-2027. redefinira obrazovanje i osposobljavanje za digitalno doba

Razvoj visokoučinkovitog ekosustava digitalnog obrazovanja te jačanju digitalnih vještina i kompetencija s ciljem digitalne transformacije (Plan komplementaran Programu vještina za Europu)

Republika Hrvatska

Modernizacija visokog obrazovanja planira se provesti... kroz sveobuhvatnu digitalnu preobrazbu visokog obrazovanja i uz infrastrukturna ulaganja usmjerena prema unaprjeđenju materijalnih uvjeta studiranja.

- Unaprjeđena kvaliteta ponude programa obrazovanja odraslih što pridonosi povećanju udjela odraslih osoba uključenih u cjeloživotno učenje.
- Povećan udio osoba s kvalifikacijom visokog obrazovanja te njihova zapošljivost.
- Unaprjeđena digitalna zrelost visokih učilišta.
- **Zakon o visokom obrazovanju i znanstvenoj djelatnosti, NN 119/22**
- **Zakon o osiguravanju kvalitete u visokom obrazovanju i znanosti**
- **Inicijalna akreditacija STUDIJSKOG PROGRAMA prema dokumentima u izradi**

Nacionalni plan oporavka i otpornosti 2021.-2026.

Unaprjeđenje dostupnosti i učinkovitosti kvalitetnog i relevantnog obrazovanja, jačanje znanstvene izvrsnosti i poticanje otvorene znanosti i suradnje s poslovnim sektorom.

Digitalna preobrazba visokog obrazovanja

- Udio osoba u dobi od 30 do 34 godine s kvalifikacijom visokog obrazovanja je 33,1% u 2019. (cilj EU: 45%).
- Udio odraslih osoba u dobi od 25 do 64 godine uključenih u cjeloživotno učenje je 3,5% u 2019. (cilj EU: 47%).

Digitalna transformacija pravne profesije

I. stadij – kasne 70-te 20 st.

- elektronička obrada podataka i računarstva, uporaba računalnih rješenja za izradu i obradu teksta te medija za pohranu podataka

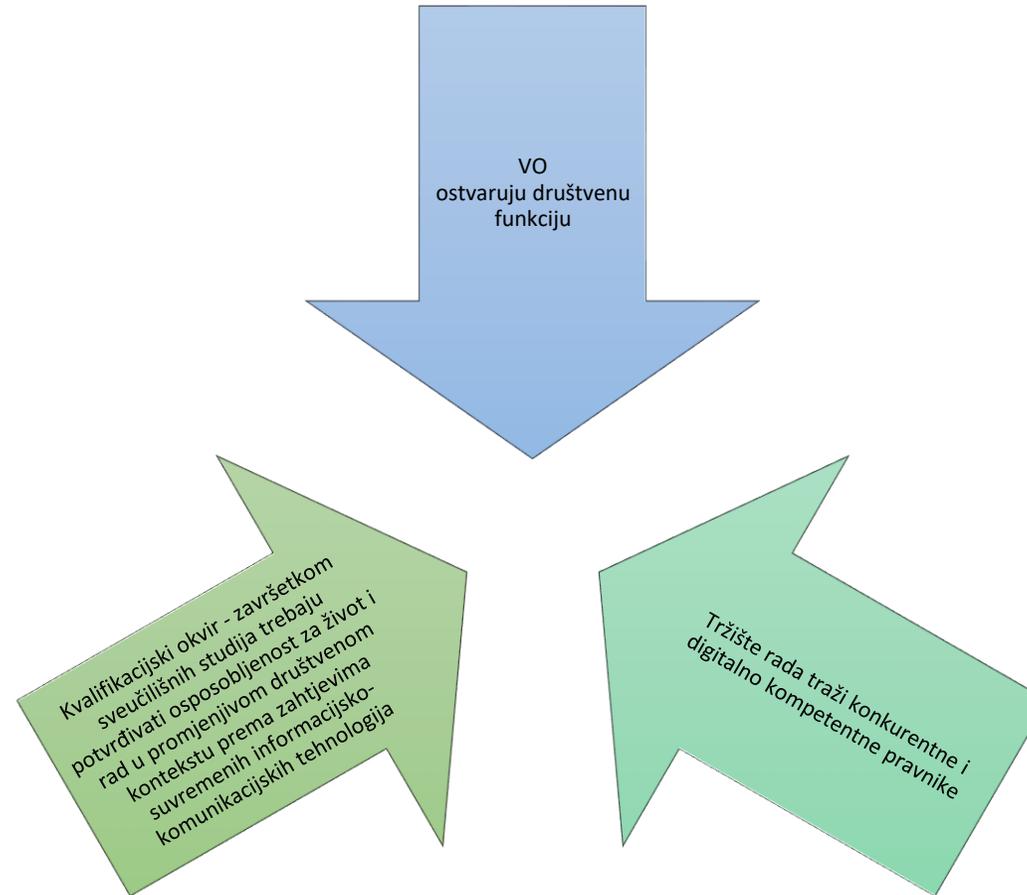

II. stadij - prijelaz milenija

- uporaba velikih podataka (eng. Big data) i modernih telekomunikacija
- akumulacija i obrada veće količine pravnih materijala kroz pohranu i decentralizaciju podataka u „oblaku“, uporaba elektroničke pošte, ali i videokonferencijskih sustava koji omogućuju neposredniju virtualnu komunikaciju u stvarnom vremenu

III. stadij – od 2015

- uporaba umjetne inteligencije, algoritama te sustava za automatizirano donošenje odluka
- globalni disparitet u stupnju razvoja trećeg stadija digitalne transformacije pravne profesije

Digitalna transformacija VO u polju prava

E-učenje za VO u pravu

Razvoj IKT ima niz implikacija na sadržaj pravnih pravila i pravne prakse - što se mora odraziti na pravno obrazovanje kroz reforme kurikuluma

Utjecaj umjetne inteligencije i blockchain tehnologije dotiče se gotovo svih grana prava

Digitalizacija poslovanja široko je prihvaćena

Digitalna imovina otvara nove pravne nedoumice u okviru privatnog prava

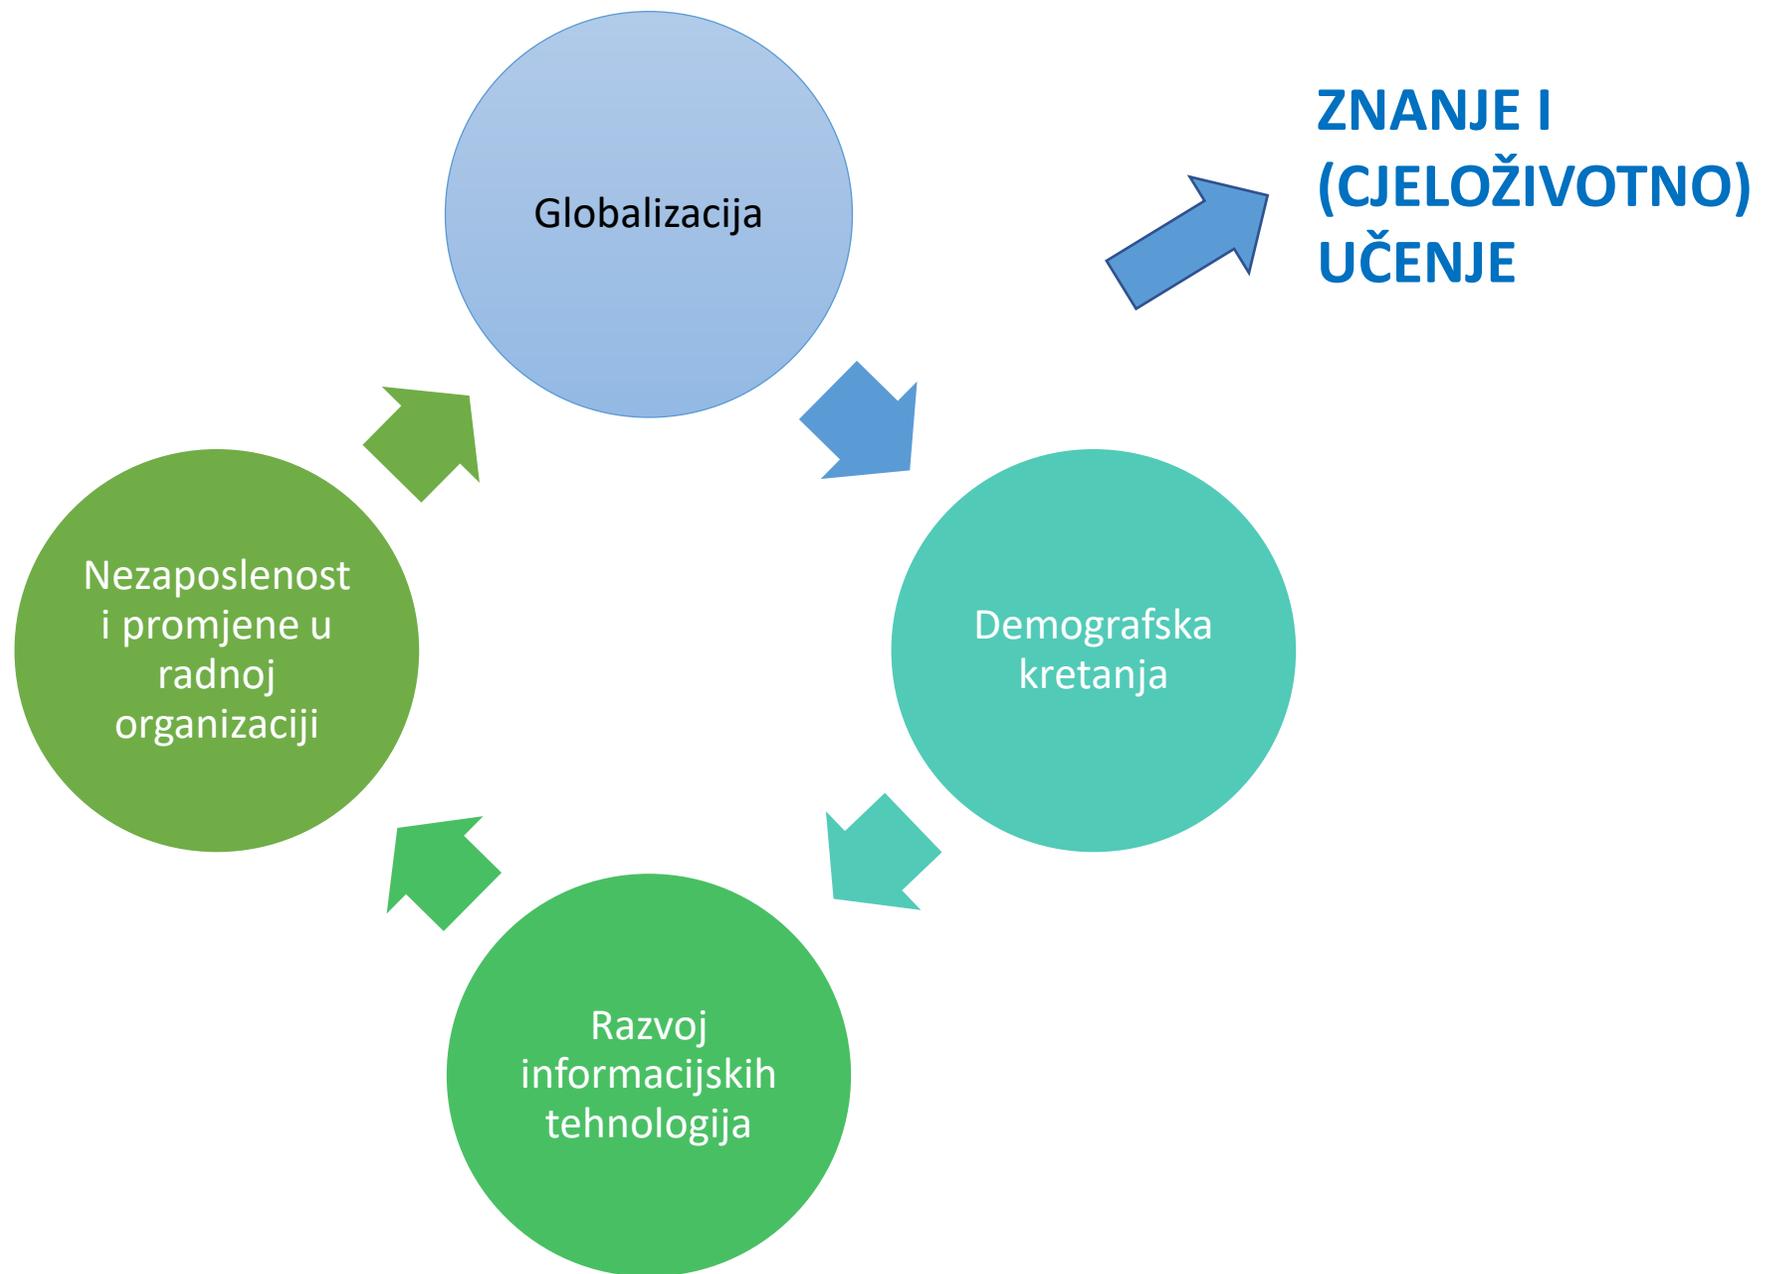

U porastu su i novi načini rješavanja sporova, kao što su alati za online rješavanje sporova, pametni sudovi te različita tehnološka rješenja koja se koriste u digitaliziranom upravljanju pravosuđem

Cjeloživotno učenje i obrazovanje

cjeloživotno obrazovanje (eng. lifelong education) ili *cjeloživotno učenje* (eng. lifelong learning), Engleska, oko 1920. godine

Tematika cjeloživotnog obrazovanja i učenja – prisutna od 1960-ih godina u službenim publikacijama međunarodnih organizacija (UNESCO, OECD i EK)

Obrazovne smjernice EU-a (Lisabon) - važnost cjeloživotnog učenja u izgradnji najdinamičnijeg i najkonkurentnijeg svjetskog gospodarskog prostora

Temeljni obrazovni ciljevi EU-a

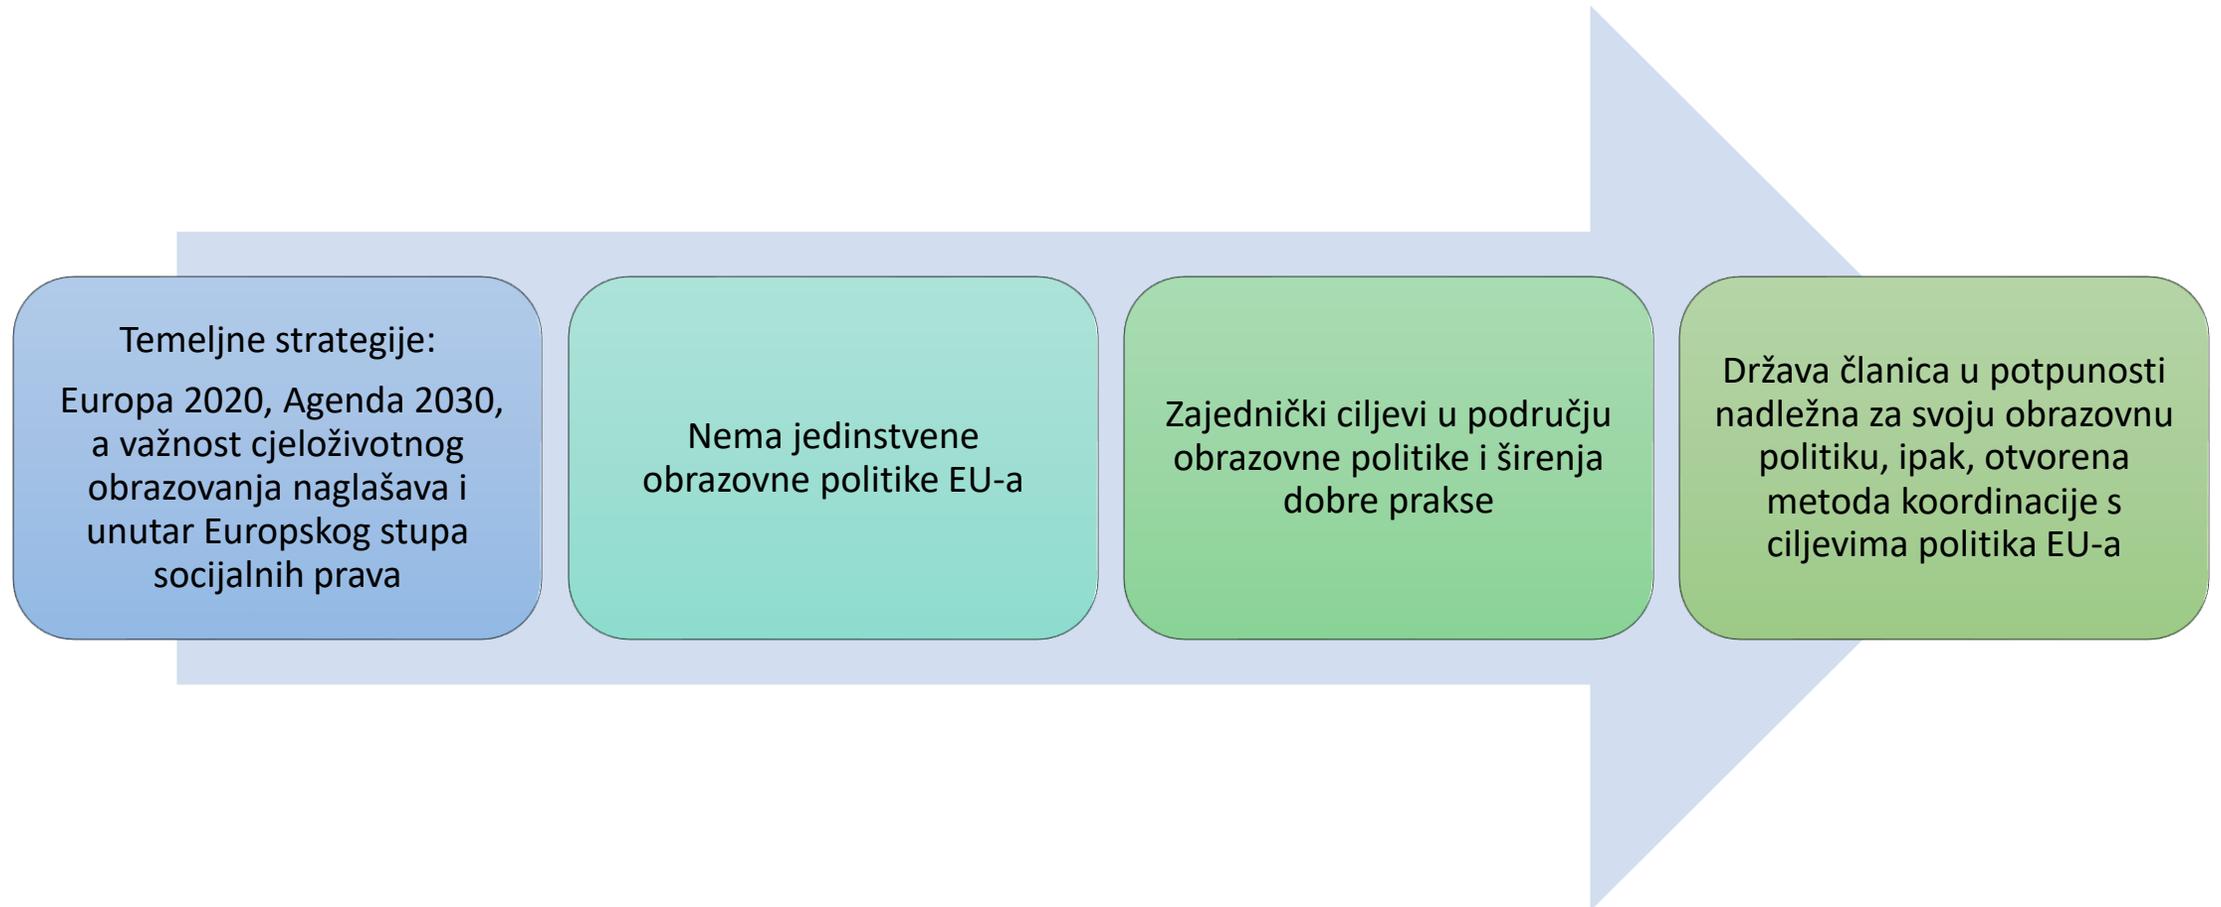

1. Ekonomska dimenzija (konkurentnost i inovativnost u gospodarstvu, stvaranje novih radnih mjesta)

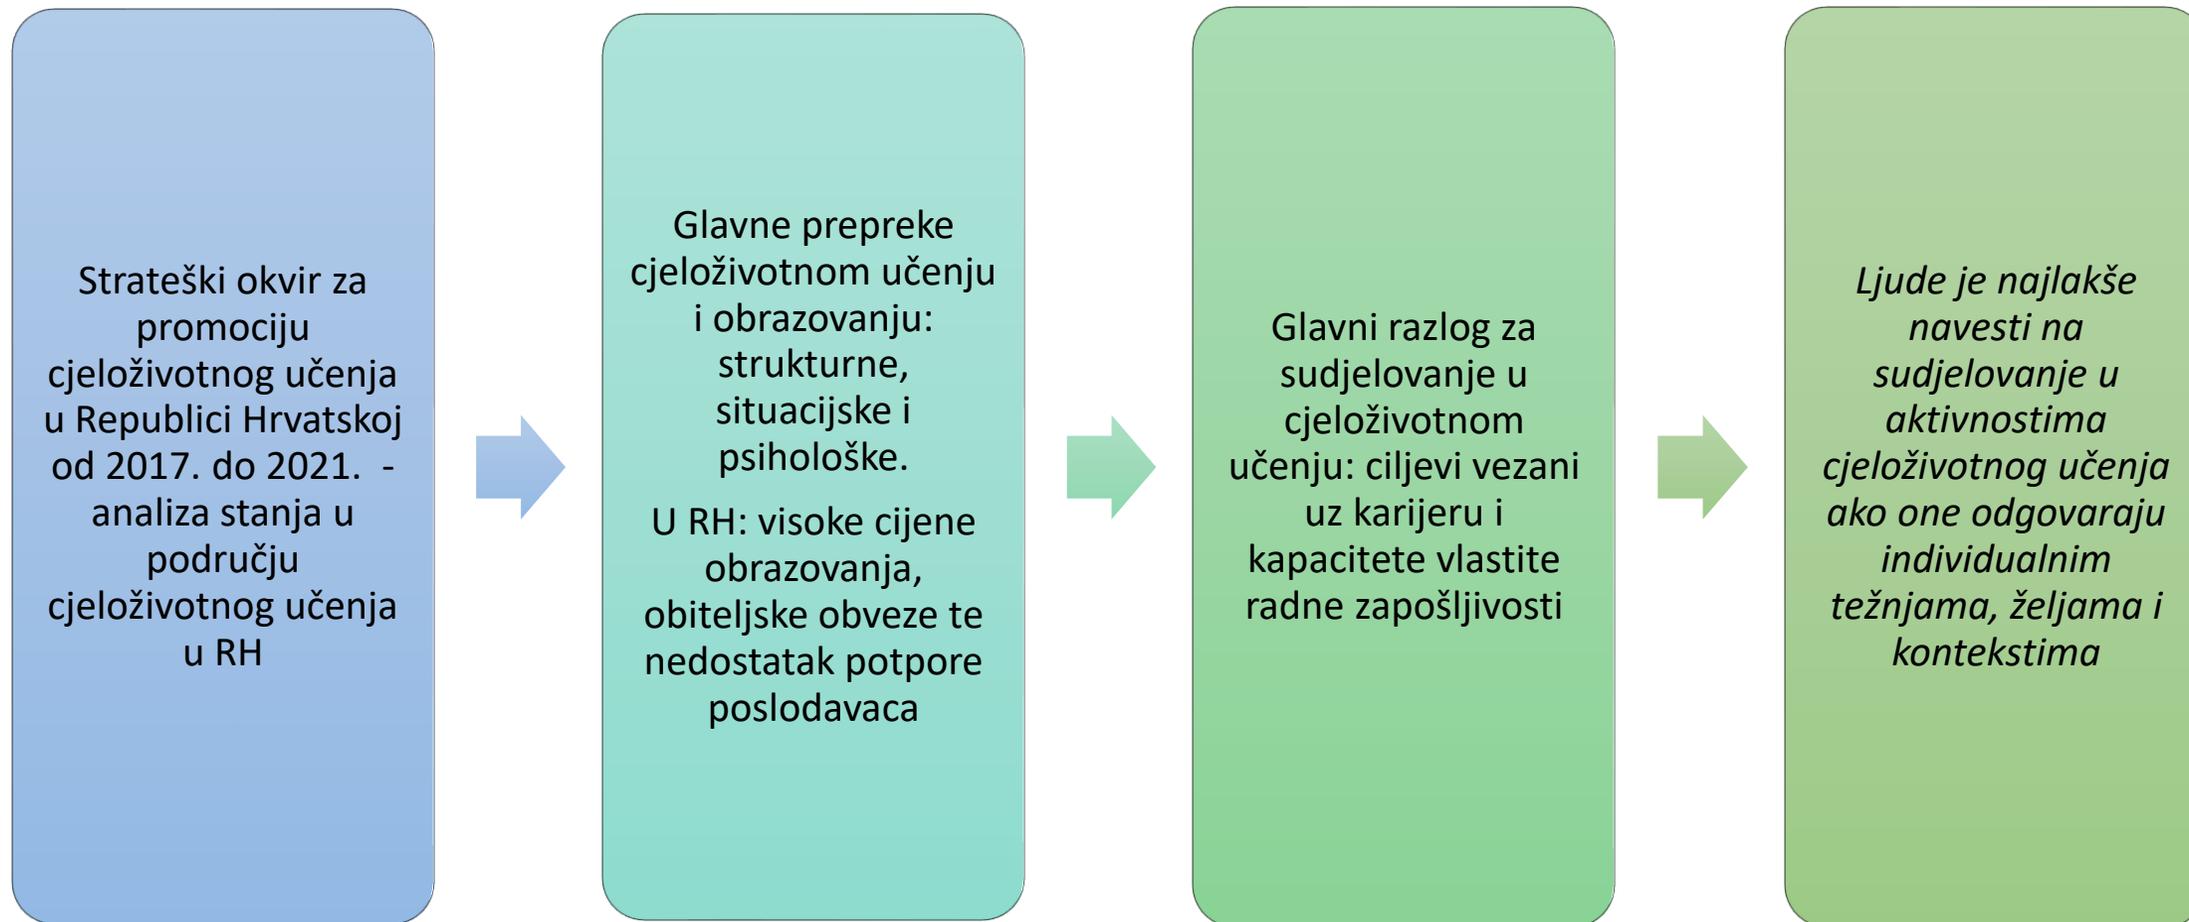

2. Socijalna i politička dimenzija (osnaživanje aktivnog građanstva i socijalne kohezije)

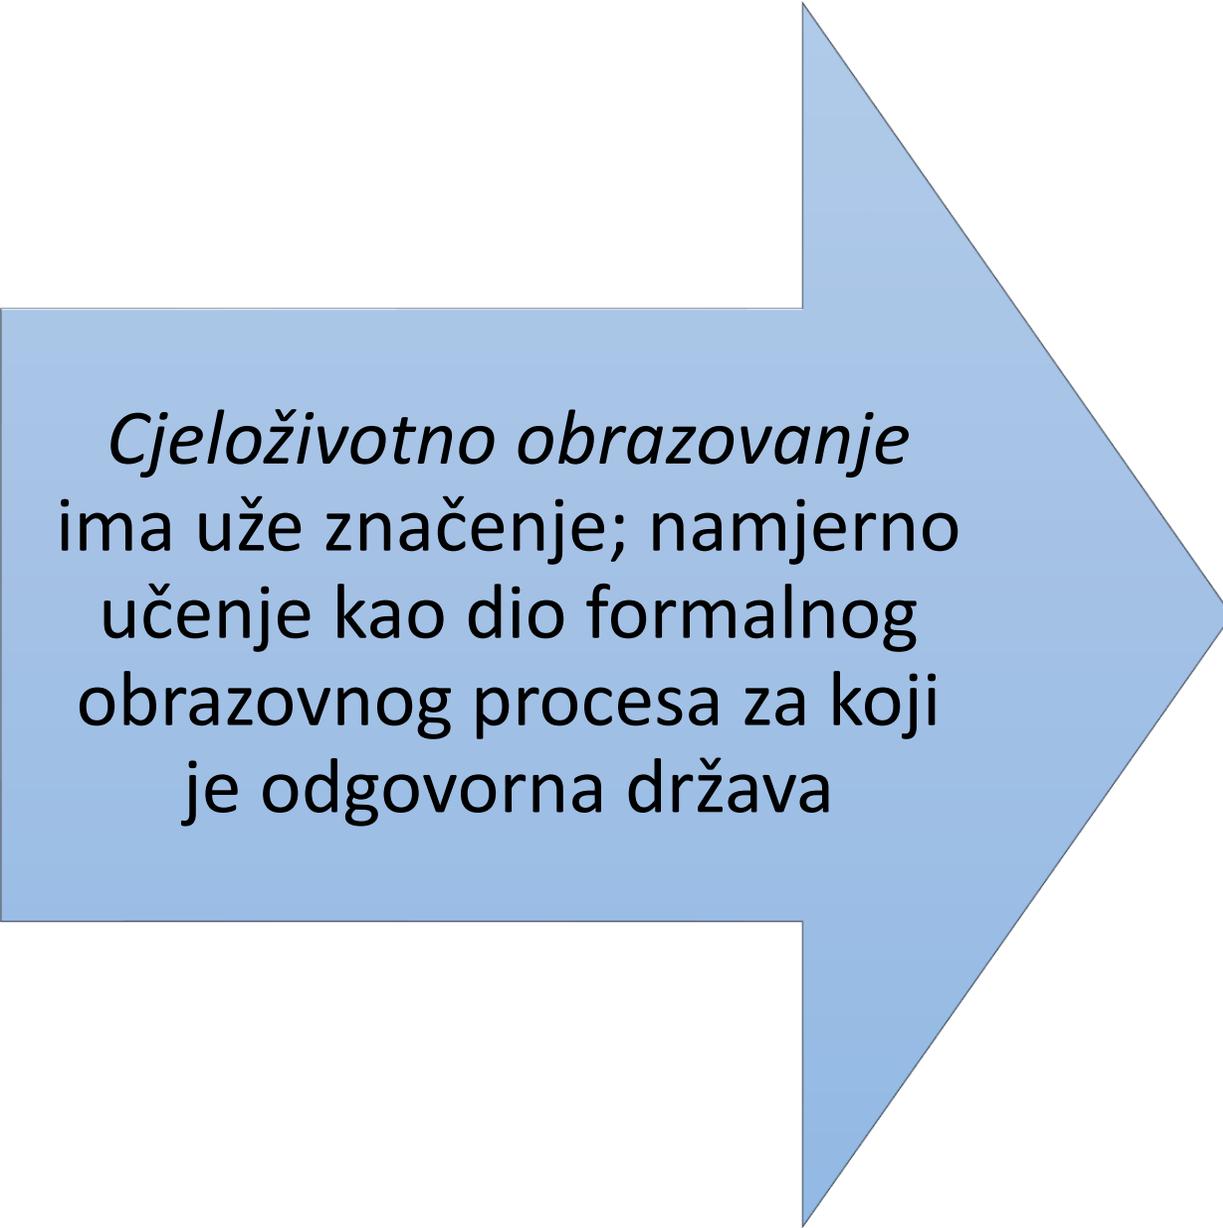

3. Osobna razina (osobno ispunjenje, jačanje građanskih kompetencija, kao i kompetencija koje povećavaju zapošljivost)

„Program za cjeloživotno učenje“ jedan od najznačajnijih integriranih pristupa cjeloživotnom učenju, sačinjen od 4 sektorska programa

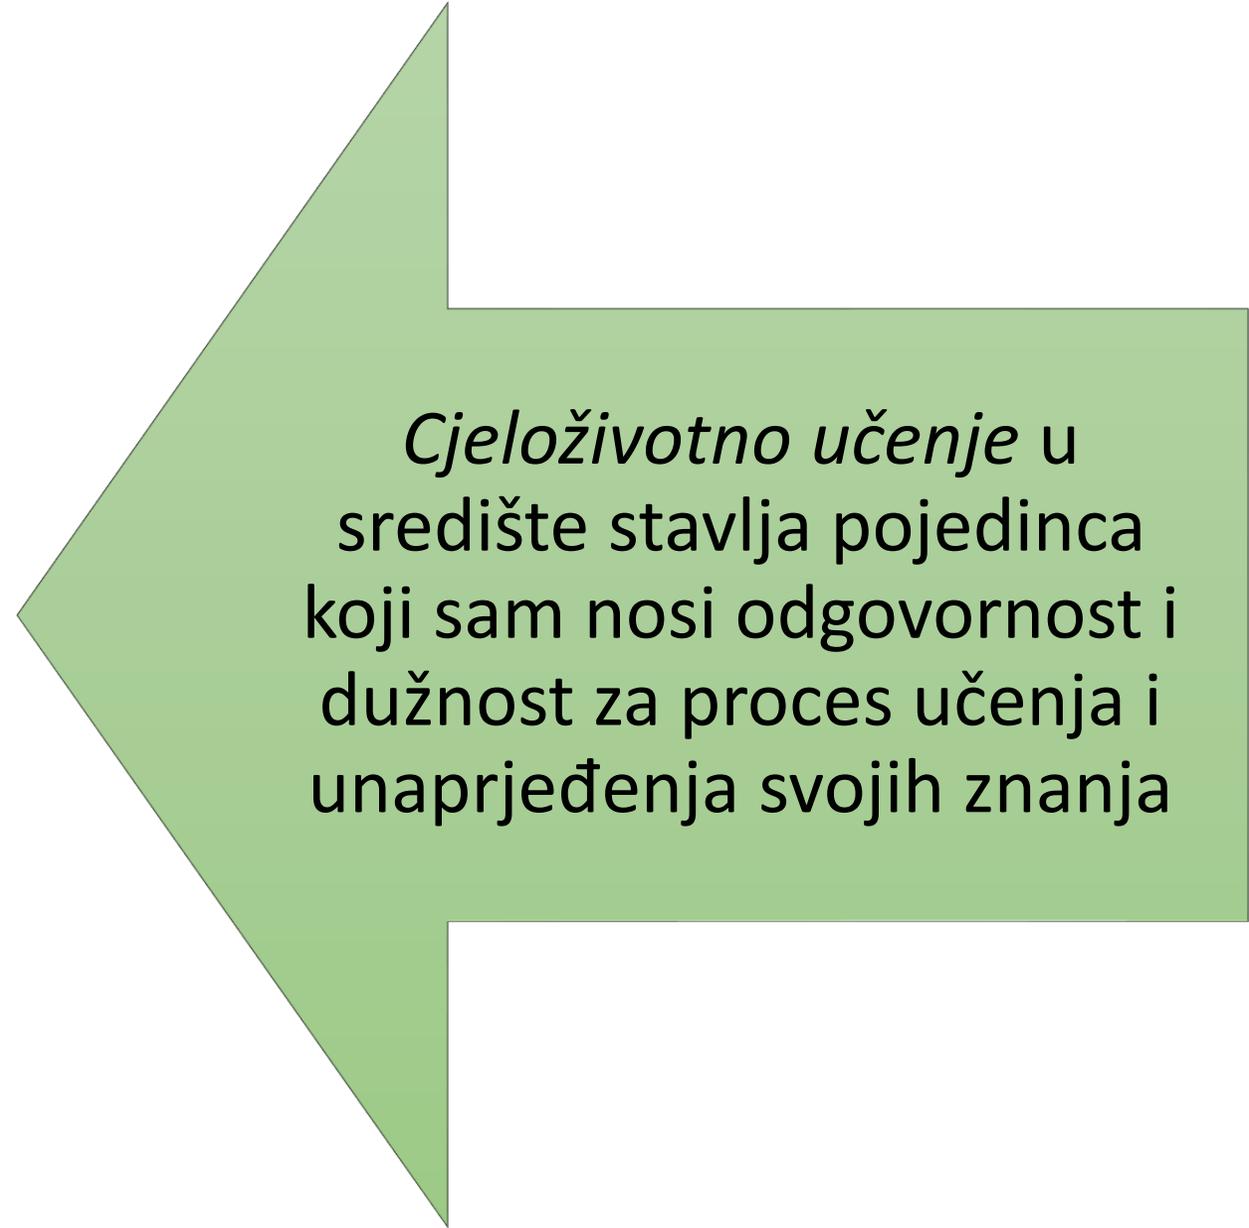

Strateški ciljevi za cjeloživotno učenje i obrazovanje u EU i RH

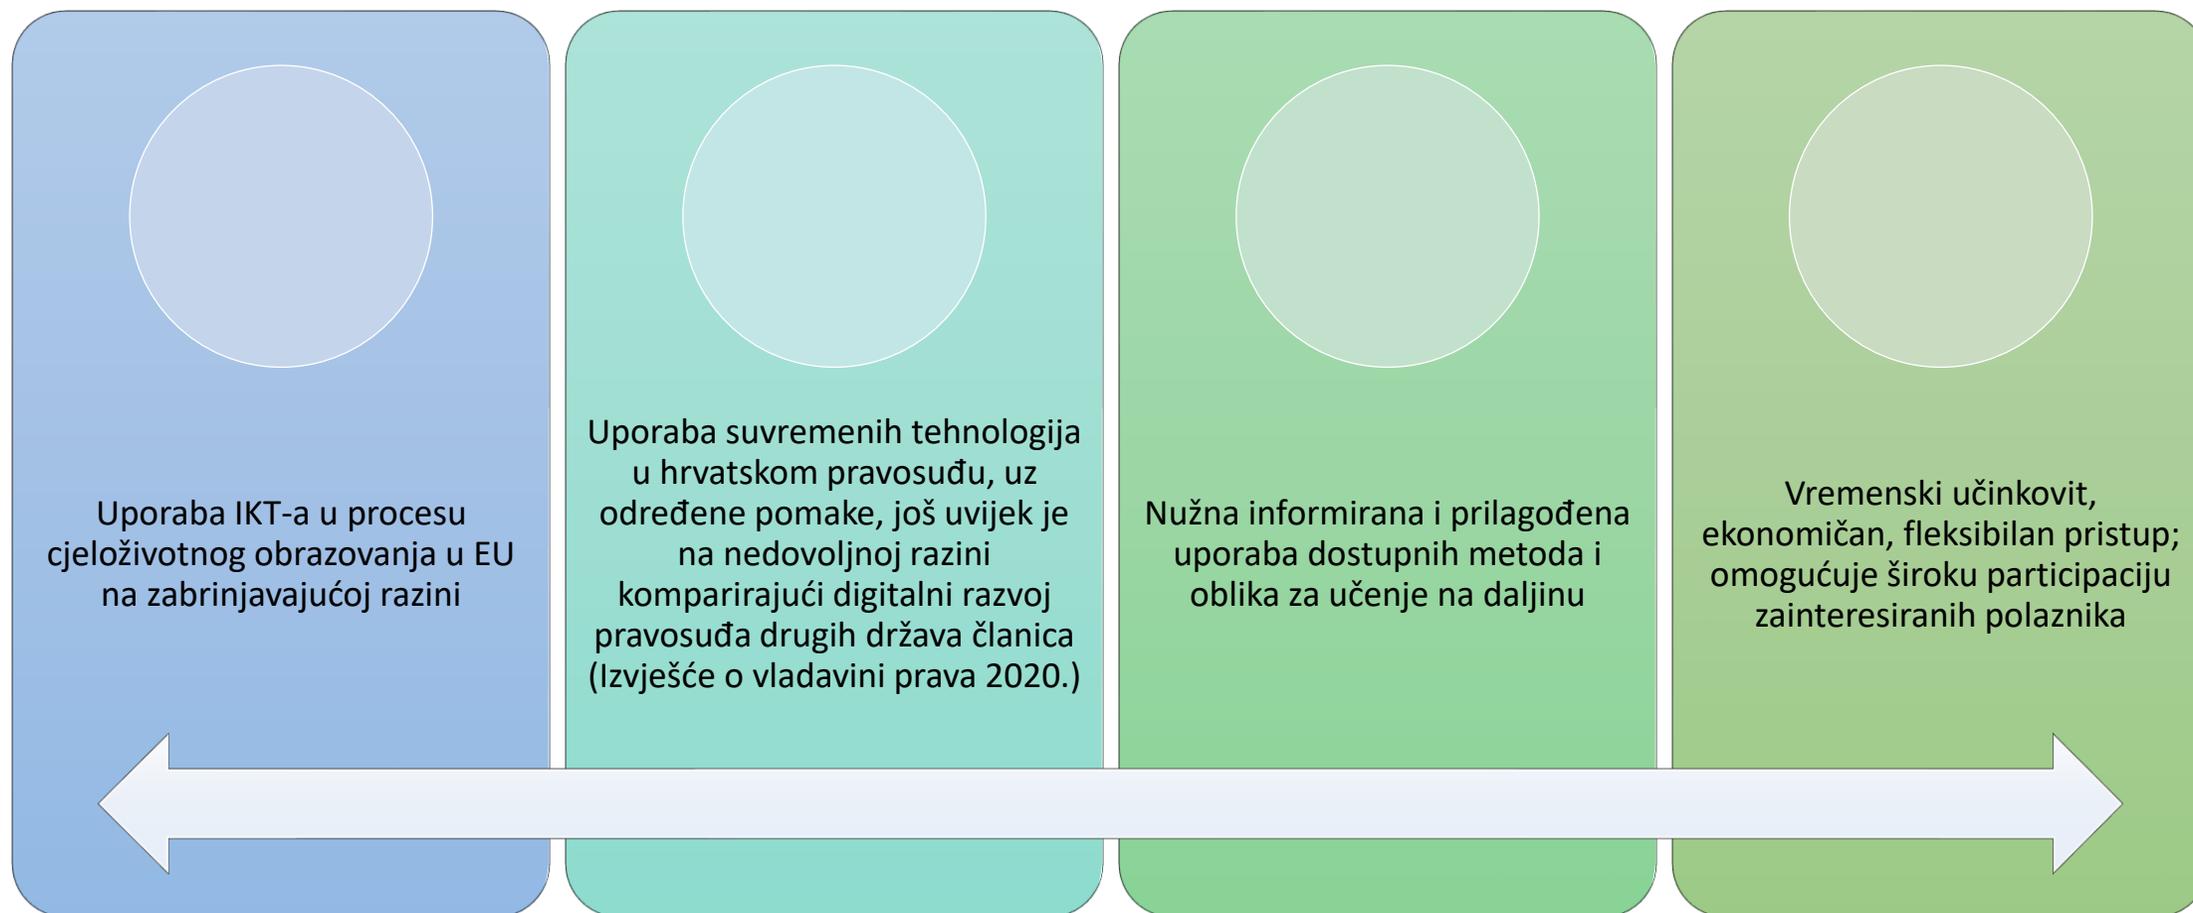

Cjeloživotno obrazovanje
ima uže značenje; namjerno
učenje kao dio formalnog
obrazovnog procesa za koji
je odgovorna država

Cjeloživotno učenje u
središte stavlja pojedinca
koji sam nosi odgovornost i
dužnost za proces učenja i
unaprjeđenja svojih znanja

Potencijal e-cjeloživotnog učenja

Svaka cjelina unutar MOOC-a sastoji se barem od:

- videa/PPT-a/drugog digitalnog sadržaja (15-30 min po cjelini),
- zadatka za čitanje,
- provjere znanja/samoprovjere

Studenti rješavaju cjeline zadanim redoslijedom, bez mogućnosti „preskakanja“

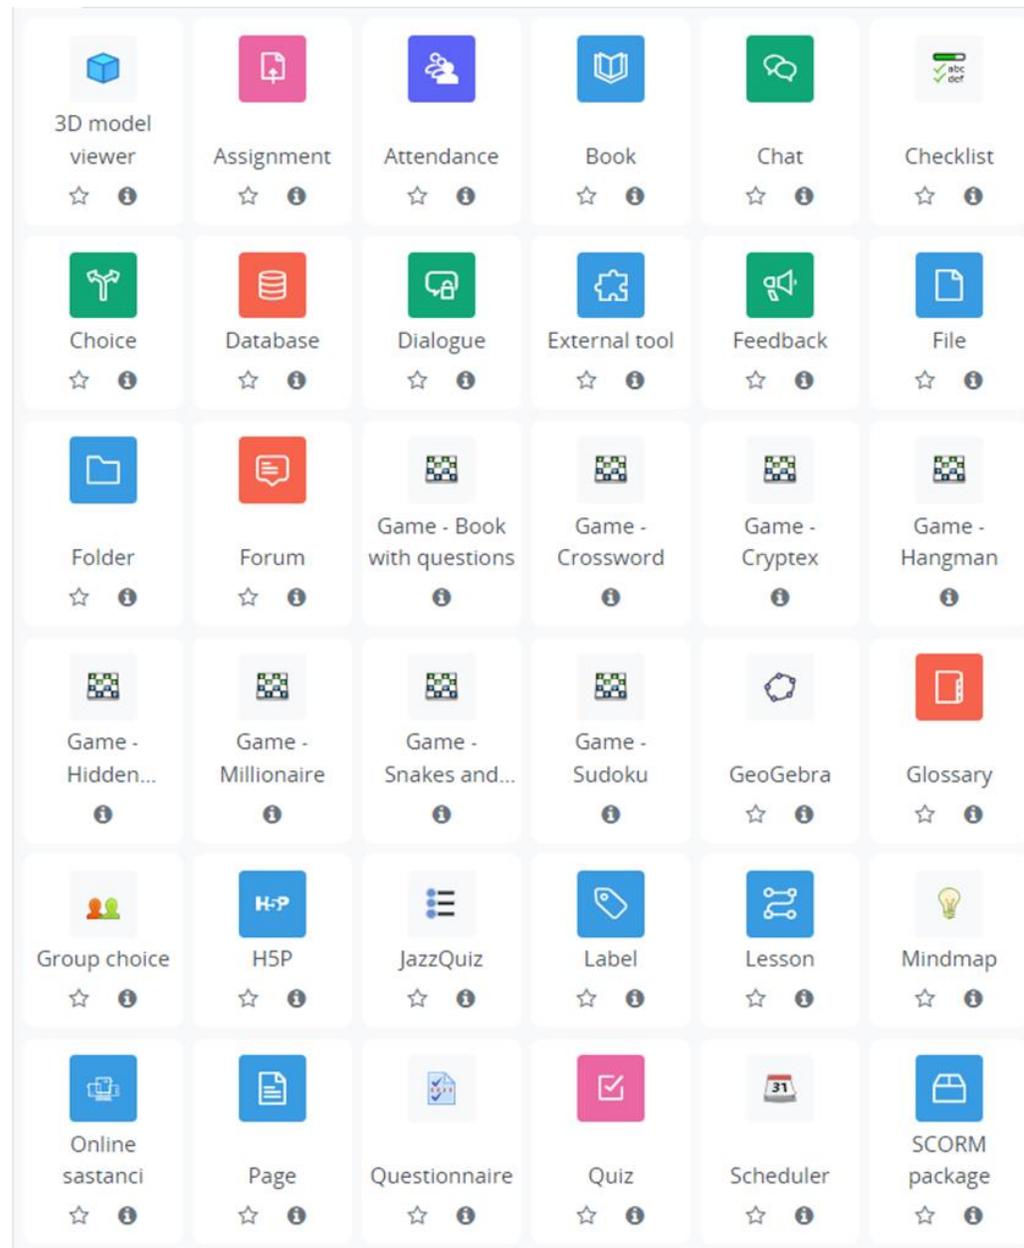

- Pristup sljedećoj cjelini uvjetovan uspješnim polaganjem provjere znanja u prethodnoj cjelini
- Neograničen broj pokušaja polaganja provjere znanja
- Završni ispit na kraju e-kolegija
- Prag prolaznosti završnog ispita: 60 – 80%

Materijali za čitanje

- U otvorenom pristupu ili autorski materijali nastavnika!
- Literatura složenošću korespondira razini 7 i 8 EQF-a

Metodološki izazovi (1)

- Konvencionalan izbor resursa u okviru e-kolegija
- Orijentiranost nastavnika prema PPT-u, ali postoje i video prezentacije / video snimke
- Usmjerenost na ustaljene oblike provjere znanja u digitalnom okruženju

Metodološki izazovi (2):

Averzija studenata prema zadacima esejiškog tipa

Potencijalni uzroci: engleski jezik; povećani angažman; navike studenata usmjerene „instant“ zadacima / odgovorima

Trebaju li nas takve navike zabrinuti?

Penalizacija pogrešnih odgovora nije primjerena e-učenju

2. European Union

In the EU cornerstone of the internal EU free movement of goods, services, capital and people across borders is constantly on the increase. In civil matters, the European Union is developing judicial cooperation, thus building bridges between the different legal systems. Its main objectives are legal certainty and easy and effective access to justice, implying identification of the competent jurisdiction, clear designation of the applicable law and speedy and effective recognition and enforcement procedures. Its rules cover subject matters of civil and commercial law, which includes a wide range of fields varying from family law to sales law. It also covers aspects of procedural law, in particular in taking evidence abroad, possibility for using videoconferencing systems in crossborder proceedings, size an account in another state.

EU has shown its determination for simplifying judicial cooperation in civil matters by the use of information and communication technologies in the administration of justice in June 2007, with European e-Justice Strategy. The **e-Justice tools** cover:

- the [European e-Justice portal](#), which aims to facilitate access by citizens and enterprises to justice in Europe;
- better use of [videoconferencing](#) during judicial proceedings;
- innovative translation tools such as automated translation (e.g. [EU presidency Translator](#); [N-Lex](#));
- [dynamic online forms](#).

Recent EU initiatives aim to make digital communication channels the **default channel in cross-border judicial cases**.

Uniform rules of private international law can coordinate relationships between different private law systems. This helps to avoid fragmentation and legal uncertainty that can undermine innovation and good business practices.

Do you agree with this thesis? After reading the prof Guillaume's article, write your short review (300 - 500 words) on the advantages and disadvantages of the unification of private international law rules on blockchain transactions.
